

**KaPre**

**Spectra**

## CONCENTRATED FULVIC ACID SOLUTION

### About KaPre Spectra .....

**KaPre® Spectra** improves the foliar uptake of nutrients and micronutrients and can improve fertilizer performance when added to starter or foliar fertilizer applications.

### Benefits of KaPre Spectra .....

#### Increases nutrient absorption

- Makes nutrients more absorbable by complexing them into organic, ionic forms that are easily transported through cell membranes

#### Improves fertilizer efficiency

- Increases plant uptake of soil and foliar applied nutrients. The low molecular weight formulation improves mobility through cell walls to plant growth points

#### Improves tank mix compatibility.

- KaPre Spectra is compatible with foliar applications of non-selective herbicides, fungicides, insecticides and other pesticides. In fact, it provides tank mix compatibility of fertilizer/pesticide combinations.

#### Detoxifies pollutants.

- Fulvic acid is vital in helping form new species of metal ions, binding with organic pollutants such as pesticides and herbicides, and catalyzing the breakdown of toxic pollutants.

#### Helps transport nutrients.

- KaPre Spectra also plays a role in helping transport nutrients into plant foliage and roots. The highly active low-molecular weight formulation improves mobility of solution through cell walls to plant growth points. This results in a more productive and impactful application.

#### NON-PLANT FOOD INGREDIENTS

Fulvic Acid.....	20%
Other Ingredients.....	80%
Total.....	100%

### Application Instructions

- KaPre Spectra may be blended with any compatible fertilizers and foliar sprays applied to all row crops, field crops, forage crops, feed crops, vegetable crops, trees, nut trees, vines.
- KaPre Spectra can be foliar-applied at up to 12 ounces per acre per application.
- Apply at least 2 oz. per acre in all foliar applications.

#### Applications with Herbicides:

- KaPre Spectra may be applied at rates of 2 - 12 ounces per acre with non-selective herbicides.
- KaPre Spectra may increase the absorption and efficacy of herbicides.
- KaPre Spectra is NOT recommended for use with pre-emergence herbicides.
- KaPre Spectra is NOT recommended for use with selective herbicides.
