

## (0-0-4) FOLIAR NUTRITION for Dicamba-Tolerant Crops

### About Hype®-D

Plants need a “balanced diet” to grow and develop properly. **Hype-D** was developed to be a quick and efficient source of the nutrients needed for productive plants. When applied with a herbicide, Hype-D will help minimize the effect herbicides can have on the immobilization of nutrients within the plant. Incite™ Plant Growth Regulator is an excellent partner product with Hype-D to maximize yield potential.

### Hype-D Formulation

#### NPK, Krystal Klear® Ca, Mg, B, Cu, Fe, Mn and Zn

Adequate, balanced nutrition is important for plant development and enhanced plant health. Micronutrients help build up the plants natural immune system to keep early season diseases at a minimum. Our micronutrients are chelated with IDS and EDTA for superior performance. This dual-chelation technology results in better uptake with much lower rates than competitive products.

#### KaPre® PhoNix

Contains organic compounds that help reduce the effects of environmental stress as well as optimize yield.

#### Prudent® K28

Formulated with potassium phosphite that is quickly absorbed by plants. It is extremely mobile within the plant and will complement systemic acquired resistance and contribute to overall plant health.

#### Sugar

An additional carbon source for energy that is immediately available to the plant. Also helps reduce burn on plant tissues from fertilizers.

### GUARANTEED ANALYSIS

Available Phosphate (P <sub>2</sub> O <sub>5</sub> ).....	4.0%
Soluble Potash (K <sub>2</sub> O).....	4.0%
Calcium (Ca).....	0.03%
0.03% Chelated Calcium (Ca)	
Magnesium (Mg).....	0.03%
0.03% Chelated Magnesium (Mg)	
Boron (B).....	0.06%
0.06% Water Soluble Boron (B)	
Copper (Cu).....	0.02%
0.02% Chelated Copper (Cu)	
Iron (Fe).....	0.01%
0.01% Chelated Iron (Fe)	
Manganese (Mn).....	0.06%
0.06% Chelated Manganese (Mn)	
Zinc (Zn).....	0.06%
0.06% Chelated Zinc (Zn)	

Derived from: monopotassium phosphate, calcium EDTA, boric acid, copper EDTA, iron EDTA, magnesium EDTA, manganese EDTA, zinc EDTA, potassium hydroxide and potassium phosphite.

### Benefits of Hype-D

- Will reduce and minimize the “yellow flash” from an herbicide application.
- Results will be visual within 48 hours of application on soybeans affected by low Manganese.

### Application Instructions

Hype-D may be applied to all types of crops including but not limited to: corn, soybeans, wheat, and cotton as a foliar application at a rate of .5 to 1 gallon per acre. Applications may be made at crop emergence and every 10 to 14 days throughout the growing season, as needed. Use sufficient carrier to adequately cover crop foliage.

**Caution:** Plant and leaf injury may occur on some crops when certain weather and growing conditions are present.

*Hype-D is recommended as a supplement to a well balanced fertilizer program.*

**HYPE-D IS A COMPANION PRODUCT FOR ENGENIA®**
