

BLEND PHOTOHORMONE SOLUTION

Multi-year yield average advantage of 1 Incite Application vs. None:

+9.1 bu./ac. increase in corn
+1.2 bu./ac. increase in soybean

Multi-year yield average advantage of 2 Incite Applications vs. None:

+12.8 bu./ac. increase in corn
+3.1 bu./ac. increase in soybean

About Incite®

Incite is a blend of bio-stimulants containing naturally-occurring and synthetic plant growth regulators and plant hormones known to promote cell division, shoot initiation, and bud formation, and, stimulate chlorophyll synthesis and leaf expansion from cell enlargement. They work with the plant's own natural physiology to stimulate top growth, increase vigor and improve overall plant health.

Benefits of Incite

- Promotes cell division, shoot initiation and bud formation.
- Larger leaves and fruit—stimulates chlorophyll synthesis and leaf expansion from cell enlargement.
- Plants more tolerant of heat, cold and drought.
- Plants less susceptible to disease.
- Higher yields.
- Faster seed germination.
- Deeper roots.

Application Instructions

Field Crops, Fruits, Tree Nuts, Vegetables, Herbs & Spices:

4 to 8 oz. per acre

Seed Treatment:

1 to 4 oz. per 100 pounds of seed

Transplant and Rooting Solutions:

1 to 2 oz. per 5 gallons of solution

ACTIVE INGREDIENTS

Indole-3-Butyric Acid (IBA) - Auxin	0.05%
Gibberellins	0.05%
Cytokinins	0.09%
Other Ingredients	99.81%

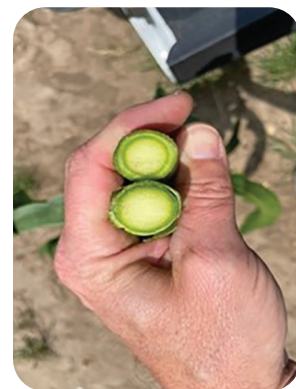

In the Field

Left: **UNTREATED**
Right: **INCITE**

Top Leaf: **UNTREATED**
Bottom Leaf: **INCITE**
