LIQUID BORON 10%

MICRONUTRIENTS

About Innova[®] Liquid Boron 10%

Innova Liquid Boron 10% is a safe and effective Boron solution for both Soil and Foliar applications. It contains 10% Boron derived from boric acid.

Since boron is non-mobile within the plant, a continuous supply of Innova Performance Products' Liquid Boron 10% is essential throughout the growing cycle. Split or frequent applications at labeled amounts are most effective.

Benefits of Liquid Boron 10%

- Strengthens plant cell walls.
- Improves membrane function and cell division and elongation.
- Enhances the transport and metabolism of sugars and carbohydrates.
- Helps in development of flowers and fruit.
- Helps in maintaining proper balance other minerals such as calcium and magnesium.
- Aids in making plants more resistant to disease and pests.

GUARANTEED ANALYSIS

Boron (B).....10.0%

Derived from: boric acid.

Application Instructions

Soil Applications:

Rates vary from 2-8 quarts per acre, depending on local professional recommendations. Apply alone, or as tank mix. Use sufficient agitation to insure proper mixing. Apply uniformly across field to prevent plant injury.

Foliar Applications:

Apply 1 to 2 quarts per acre per application. Product can be applied at 10-14 day intervals during rapid growing and fruiting stages. Do not exceed 2 quarts per acre in any one spray application.

Innova Liquid Boron 10% is a valuable micronutrient for use with Cotton and Soybeans.

It is a critical nutrient needed during flower and fruit development.
