

## PATENTED CHELATED MICRONUTRIENT SOLUTIONS

### About Krystal Klear®

**Krystal Klear** micronutrient solutions are produced using a patented “dual-chelation” system for optimal performance. Krystal Klear micronutrient solutions have excellent tank-mix compatibilities, provide quick uptake of micronutrients, and deliver a sustained response. Ideal for foliar, hydroponic and drip applications. Can be applied with ortho-phosphates!

### CHELATED MICRONUTRIENTS FOR AGRICULTURE

<p><b>Krystal Klear® Agra Mix II</b> Chelated 2% B, 2% Mn, 2% Zn and 0.5% Cu solution</p>	<p><b>Field Crops:</b> Apply 1 quart per acre when plants are young. This is the time when the most severe deficiencies occur.</p>
<p><b>Krystal Klear® Agra Mix III</b> Chelated 2% B, 2% Mn, 2% Zn, 0.5% Cu and 0.25% Fe solution</p>	<p><b>Vegetables:</b> Apply 1/2 to 1 quart per acre each spray. Krystal Klear Mixes can be incorporated into the normal spray program.</p>
<p><b>Krystal Klear® Crop Mix II</b> Chelated 4% Zn, 1% Mn, 0.5% Cu, 0.25% Fe and 0.1% B solution</p>	<p><b>Tree and Vine Crops:</b> Apply 1 quart per 125 gallons of spray mixture. If concentrated spray is used, increase the concentration in direct proportion to the dilution.</p>
<p><b>Krystal Klear® B</b> 5% complexed boron solution</p>	<p>Complexed boron for quick corrections of boron deficiency. Boron is essential for optimal root and tissue levels.</p>
<p><b>Krystal Klear® Ca</b> 3% chelated calcium solution</p>	<p>Chelated calcium for quick corrections of calcium deficiency. Calcium is essential for cell wall development and root growth.</p>
<p><b>Krystal Klear® Cu</b> 5% chelated copper solution</p>	<p>Quickly corrects copper deficiencies. Copper is essential for crop growth and the activation of many enzymes.</p>
<p><b>Krystal Klear® Fe</b> 4% chelated iron solution</p>	<p>Quickly corrects iron deficiencies.</p>
<p><b>Krystal Klear® Mg</b> 3% chelated magnesium solution</p>	<p>Magnesium is essential for photosynthesis in plants and prevents yellowing of leaves.</p>
<p><b>Krystal Klear® Mn</b> 5% chelated manganese solution</p>	<p>Quickly corrects manganese deficiencies. Manganese activates enzymes required for amino acid production.</p>
<p><b>Krystal Klear® Zn</b> 9% chelated zinc solution</p>	<p>Quickly corrects zinc deficiencies. Zinc controls the synthesis of indoleacetic acid, which regulates plant growth.</p>
