General Information

Chrome FleX is a combination product of urea and KTS along with KaPre® Spectra OC and Krystal Klear® AgraMix III chelated micronutrients and combination of other assorted plant health components. This is an excellent product for both the herbicide and fungicide pass on soybeans.

Applications on corn should be done during the V5-VT stages of growth and wheat applications can be made from green up to flag leaf.

Incite™ Plant Growth Regulator is an excellent partner product with Chrome FleX to maximize yield potential.

WARNING: The use of Boron on any crops other than those recommended may result in injury to the crop. Contact your county agent or field representative before making application.

Application Instructions

Chrome FleX may be applied to all types of crops including but not limited to: Corn, Soybeans, Wheat, and Cotton as a foliar application at a rate of 1 to 3 gallons per acre. Applications may be made at crop emergence and every 10 to 14 days throughout the growing season. Use sufficient carrier to adequately cover crop foliage.

Caution: Plant and leaf injury may occur on some crops when certain weather and growing conditions are present.

Compatibility

Chrome FleX is compatible with most pesticides. However, do not mix Chrome FleX with pesticides or other chemicals without performing a compatibility test. An adequate test for compatibility involves mixing in a small container the proper proportions of the product with water and the other ingredients. Agitate and let stand for one hour. If a precipitate forms, then apply the products separately.

Storage and Handling

Store Chrome FleX in a cool place and out of direct sunlight. It is recommended that Chrome FleX be stored in fiberglass, polyethylene or polyolefin. Do not stack pallets.

Store locked up. Store in a well-ventilated place. Keep container tightly closed. Dispose of contents/container to an approved waste disposal plant in accordance with local/regional/national regulations.
