CLAMP

Soil Surfactant

Improves water movement and retention in the seed/residual zone, keeping soil-applied herbicides and nutrients in the top soil profile.

- Moves and holds water uniformly in the seed and residual zone
- Increases deposition and absorption of soil-applied herbicides and nutrients
- Helps reduce leaching and off-target movement
- Compatible with multi-product tank mixes
- Ideal for fall and spring residual herbicide applications

GENERAL INFORMATION

Suvon CLAMP is a soil surfactant and retention aid that keeps soil-applied inputs in place. Its blend of non-ionic surfactants and resin technology improves wetting, enhances adsorption of residual herbicides in the upper soil profile, and promotes even moisture distribution.

Suvon CLAMP improves uniformity, deposition and extends the performance of residual herbicides and soil-applied nutrition.

USE RATE AND PACKAGING

	Use Rate: 1-2 pt/ac*
	Weight/Gallon: 8.17 lb/gal
	Package Sizes: 270 gal totes; 2x2.5 gal jugs

*** Refer to the product label for more specific rate information.**
