TRIO

Water Conditioner without AMS

A non-AMS based water conditioning agent that improves pesticide performance in hard water by neutralizing hard water ions.

- Sequesters, chelates, and complexes hard-water ions to protect susceptible active ingredients
- Conditions water across a wide range of mineral loads and pH
- Compatible with glyphosate and most herbicide tank mixes

GENERAL INFORMATION

Suvon TRIO is a non-AMS based water conditioning agent. It addresses hard water and pH-related antagonism that can reduce the efficacy of applied herbicides.

Suvon TRIO ties up Ca, Mg, Fe, and other ions through sequestering, chelating and complexing, helping sensitive active ingredients stay in solution.

Use wherever labels recommend water conditioning but do not require ammonium sulfate.

USE RATE AND PACKAGING

	Use Rate: 1-2 qt/100 gal*
	Weight/Gallon: 9.72 lb/gal
	Package Sizes: 270 gal totes; 2x2.5 gal jugs

*** Refer to the product label for more specific rate information.**
